SWITZERLAND.

LIST OF ARTICLES THE EXPORT OF WHICH IS PROHIBITED.

November 2, 1915.

NOTES.

1. The Federal Council reserves to itself the right to authorise exceptions to the prohibitions of exportation which have been established in respect of the following goods by successive Decrees of the Federal Council.

2. Notwithstanding the prohibition of export, prohibited goods may be sent in transit through Switzerland in sealed wagons.

The *importation* of cereals (wheat, spelt, barley, rye, oats, maize), of the products resulting from the grinding thereof, including forage meal and bran, as also of all concentrated forage necessary for the feeding of cattle, is reserved exclusively to the Confederation. *The re-exportation of such imported products is absolutely prohibited.* [*Decree of January 7, 1915*].

4. The Swiss prohibitions of exports are, in the main, based on the classification of the Swiss Customs Tariff, and the numbers quoted below are the Tariff numbers under which the prohibited goods fall.
